HEALTHY ALL YEAR

Your diabetes checkup checklist

At-home care and regular checkups can help prevent health problems that can come with diabetes. Use this checklist to keep track of the self-checks and screenings you need every day, every six months and every year to stay on top of your health.

Stay healthy and save money? Yes!

You can use the monthly benefit amount on your Extra Benefits Card to buy healthy foods or select over-the-counter (OTC) health items like sunscreen and pain-relief medicine at approved in-store locations. Or use it to get a ride to and from medical appointments. Be sure to select credit, not debit, at checkout — you do not need a PIN.

To learn more, call a Member Experience Advisor 24/7 at **1-877-204-1817 (TTY: 711)**. Visit **aetna.com/1-feb24** to learn more. Or scan this QR code with your smartphone.

Every day

-  **Blood sugar** Monitoring your blood sugar once or twice per day will help you make sure your levels are the healthiest for you. You can check your blood sugar levels at home by using a monitor. Look at your Evidence of Coverage (EOC) for blood glucose monitor coverage.
-  **Foot check** Certain foot problems like open sores, numbness or swelling are common for those with diabetes. Look for any changes to your feet every day. Call your doctor if something isn't right.

Every six months

-  **A1C** Your A1C is the average of your blood sugar levels over time. It's a good idea to get this test at least twice a year, or more often if your doctor recommends it.

Every year

-  **Cholesterol test** Diabetes can often cause low levels of “good” cholesterol, or HDL, which helps remove cholesterol from the blood. It causes high LDL, or “bad” cholesterol. LDL can build up in arteries and cause heart problems. Stay on top of your heart health by getting a yearly blood cholesterol test.

What covered screenings do you need? Your care team can help you book covered screenings like hearing and vision exams. Call them at **1-866-409-1221 (TTY: 711)** from 8:30 AM to 5:00 PM local time, Monday through Friday.

How to respond to a stroke FAST

Strokes are a leading cause of death and disability in the United States. Luckily, the chances of recovery are higher if treatment is given in time. Use the FAST method to recognize the signs of a stroke so you can react quickly.

Face drooping

Does one side of your face droop, or is one side numb?

Arm weakness

Does one arm feel weak? Can you raise both arms? Or does one drop down?

Speech difficulty

Are you slurring your words? Can you repeat a simple sentence?

Time

Time is critical. Call **911** right away at the first sign of a stroke.

3 ways to lower your risk of any stroke

There are steps you can take to lower your risk of any type of stroke. These include:

Get active

Aim to get at least 2.5 hours of physical activity every week.¹ Do activities you love like brisk walking or dancing.

Control your blood pressure and cholesterol

If needed, make a plan with your primary care provider (PCP) to get your numbers lower.

Choose heart-healthy foods

Focus on plant-based foods such as fruits, veggies, whole grains and beans.

Ready to stop smoking? We can help you quit through counseling services and covered nicotine replacement therapy. Call Member Services at **1-866-409-1221 (TTY: 711)** from 8 AM to 8 PM local time, seven days a week, to learn more.

BENEFIT SPOTLIGHT

Say hello to your care team

As an Aetna® Dual Eligible Special Needs Plan (D-SNP) member, you have a care team ready to make sure you get the appropriate health care for your personal needs. This team of dedicated health care workers can make a powerful difference by helping you;

- Develop a personalized care plan
- Coordinate medical appointments
- Understand your medications and much more

Here are three times D-SNP care teams changed the lives and health of members for the better.

1

Member concern:

Tiffany* has diabetes. She got a new glucometer and placed an order for new glucose test strips. But the strips she received worked for her old glucometer.

Care team action:

Tiffany's care team called her network pharmacy. They updated the pharmacist with information on her new glucometer so that she could receive the correct test strips.

How they helped:

Tiffany was able to pick up her new test strips that day and begin tracking her blood sugar levels again.

2

Member concern:

Jorge* was recovering at home after a hospital stay with pneumonia. He lived alone and was not well enough to go to the grocery store.

Care team action:

Jorge's care team contacted the Aetna D-SNP meal vendor program. They arranged to have a week's worth of healthy meals delivered to Jorge's home at no extra cost.

How they helped:

Jorge was able to eat and regain his strength. He could focus on recovering instead of worrying about grocery shopping and meal preparation.

3

Member concern:

Carla* was going through chemotherapy treatment for cancer. With no family or friends living nearby, she felt lonely.

Care team action:

Carla's care team knew that social support was important for her well-being. They connected her with a cancer patient support group and arranged transportation to and from meetings.

How they helped:

Carla felt less isolated. Her new community members helped her cope better. And they also shared tips for easing chemo side effects.
